

AZUD

FILTRATION SYSTEMS

The most extensive and versatile range for filtration

▶ WHAT IT IS

SISTEMA AZUD, S.A., has developed the most extensive and versatile range for filtration, designing systems that are exclusively prepared to work in the most stringent conditions.

AZUD filtration systems are especially designed to obtain an optimum performance in filtration, combining a better efficiency in the automated filter cleaning, with the space optimisation, hence achieving a perfect integration of filtration processes during different applications.

▶ APPLICATION

- Irrigation systems filtration.
- Safety filter.
- Filtration in fountains.
- Industry Circuits protection.
- Specialists in filtration for Collective Irrigation Co-operatives.
- Protection for probe.
- Water irrigation filtration in green areas.
- Recirculation systems.
- Refrigeration towers.
- Quality adaptation of water to be dumped.

▶ AVANTAJES

- Maximum safety in filtration: filtering element of discs.
- Maximum operative capacity: exclusive modular system in a vast range of filtration. Versatility.
- Maximum savings of water and minimum maintenance: exclusive helical element.
- Maximum performance of self-cleaning: exclusive Nozzle system.
- Functions with all types of particles, irrespective of their nature and size.
